

Exhaust Unit AAS-750 – 1200 BEL

This specialized exhaust unit made of stainless steel (Material No. 14301 – ANSI 1.4301) which is to be placed on top of a table, guarantees a laboratory environment free of pollutants while slicing and preparing histological slide preparations. Airflow travels over the entire working area and is vacuumed out backwards, which provides optimal removal of unsanitary vapours. MAC (maximum allowable concentration) values for formalin are below target throughout the entire vacuum-affected area. The unit is to be connected to the exhaust system which needs to be provided by the customer.

- Left and right a glass sealing made of ESG security glass
- Very sturdy, perforated working plate made of stainless steel
- Exhaust duct is on top
