The

Stepper®

MORTUARY LIFT™ COMPANY

A Lifting Experience™

An electric stair climber that's a must for your funeral home!

The Stepper is your second attendant.

Removing the need to move the deceased up and down flights of stairs, The Stepper takes away any potential strains. With a folding handle, a robust frame and sturdy wheels that never needs inflating, the device is not only strong enough to meet your expectations, it's also easily maneuverable across all kinds of surfaces and spaces.

Improve your OH&S standards instantly!

- 170kg weight capacity
- Dimensions - 30 x 50 x 200cm

The Stepper includes the following:

- BodyGlide Board - Made from HDPE plastic, with multiple holes allowing for different strapping configurations
- 2 Sets of Straps - Adjustable seat belts specifically designed for The Stepper
- Battery - 24VDC battery with dedicated charger

USE BICEPS TO PHASE 3

ROLL WITHOUT CARRYING THE LOAD

User friendly controls such as an easy to access switch or adjustable top handle makes rolling with bearing the load or quickly changing between ascending or descending stairs easy to operate

Tips back to load into vehicles, with a load height of 55 to 83cm

Demonstrations are available!
